

# OTJ-1029

A cost effective and reliable machine with high speed and high productivity.

Very easy to use protective membrane keypad and a large LCD display.

All parameters such as cable lengths, stripping lengths, cable cross section, quantities and batch quantities are entered using the keyboard. Stepper motor driven wire transport with four driven wheels as well as stepper motor driven stripping knife, no blade change necessary.

Cable storage for 99 programmes.

Machine is fitted with air eject kit as standard

Comes as standard with dual plane wire Straightener.

Picture shown is without safety cover for illustration purposes.

## Technical Parameters

wire cutting length: 0.5mm-9999.9mm

cutting and stripping tolerance:  $\pm (0.2+0.002 \times \text{wire cutting length})$  mm

stripping length: 0.2- 39.9mm (according to the core wire and insulation type)

driving mode: step motor.

processed wire range: AWG10~AWG28

control: microcomputer

working power supply: AC240V/ 50/60Hz
