

Technical specifications

Power supply: 220/230 V

Watt consumption: 370 W

Revs: 0 - 200 rpm

Drum: Weight up to 30 kg

max. Ø 500 mm

max. width 600 mm

Diameter of shaft: 25 or 30 mm

Total machine weight: approx. 50 kg

Dimensions (machine casing): Height: 260 mm

Width: 375 mm

Depth: 430 mm

De-reeler with motorized axle for feeding cables, insulating tubes and other materials without any traction

- Regulation of mobile arm with safety breaking in case of cable jam
 - Basic speed adjustable by using the potentiometer
 - Maximum speed freely programmable
 - Acceleration and brake ramps freely programmable
- Accident prevention by torque limitation, electrically programmable, mechanically adjustable
 - Start-Stop operation via external machine signal
 - Free signal from and to other machines
 - Short-circuit-proof motor regulation
 - Analog-entry for light sensor controlling
